**Advice for firefighters:**

**Protective equipment:** Because fire may produce thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with a full face piece operated in pressure-demand or positive-pressure mode

### 6 Accidental Release Measures

**Personal precautions, protective equipment and emergency procedures:**

Wear protective equipment. Keep unprotected persons away.

**Environmental procedures:**

Do not allow product to reach sewage system or any water course.

Inform respective authorities in case of seepage into water course or sewage system

**Methods and material for containment and cleaning up:**

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

Dispose contaminated material as waste according to item 13.

Ensure adequate ventilation.

**Reference to other sections:**

See Section 7 for information on safe handling

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

**Components with limit values that require monitoring at the workplace:**

8052-42-4 Asphalt

TLV 0.5 mg/m<sup>3</sup>

**Additional information:** The lists that were valid during the creation were used as basis

**Exposure controls:**

If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations

**Personal protective equipment:**

**General protective and hygienic measures:**

Keep away from foodstuffs, beverages and feed

Immediately remove all soiled and contaminated clothing

Wash hands before breaks and at the end of work

Store protective clothing separately.

Avoid contact with the eyes and skin.

**Breathing equipment** In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use respiratory protective device that is independent of circulating air.

**Protection of hands:**

Protective Gloves

**Material of gloves:** Nitrile Rubber

**Penetration time of glove material:** The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed

**Eye protection:** Wear appropriate eye protection to prevent eye contact.
